Tailor-made projects

We are proud that Tower of Life is entirely our creation. We listen to the needs of our customers and design everything on an ongoing basis. We can change the shape, dimensions, colors, and markings. There is nothing to prevent the Tower from also serving as a bicycle repair station, measuring device, or information point.

Do you already have an AED?

That's great! We can add an intelligent alarm system to it to fully utilize the power of defibrillation.
