# | Który model jest najlepszy?

The image shows a side-by-side comparison of two AI models, Model A and Model B, responding to the same question: "Using only an addition, how do you add eight 8's and get the number 1000?".

**Model A's response:** "You can add eight 8's by multiplying 8 by 10 (since  $10 + 10 = 20$ ), which gives you 80. Then, you add eight more 8's to get 88, which is equal to 1000."

**Model B's response:** "You can add eight 8's to get the number 1000 by arranging them like this:"

```
888
• 88
• 8
• 8
• 8
-----
1000
```

At the bottom of the interface, there are four buttons for voting: "A is better", "B is better", "Tie", and "Both are bad".

Article:
...
{article}
...

You will generate increasingly concise, entity-dense summaries of the above article.

Repeat the following 2 steps 5 times.
Step 1. Identify 1-3 informative entities (";" delimited) from the article which are
...
Step 2. Write a new, denser summary of identical length which covers every entity ;

A missing entity is:
- relevant to the main story,
- specific yet concise (5 words or fewer),
- novel (not in the previous summary),
- faithful (present in the article),
- anywhere (can be located anywhere in the article).

Guidelines:
- The first summary should be long (4-5 sentences, ~110 words) yet highly non-speci...

- Make every word count: rewrite the previous summary to improve flow and make spa...
- Make space with fusion, compression, and removal of uninformative phrases like "...
- The summaries should become highly dense and concise yet self-contained, i.e., ei...
- Missing entities can appear anywhere in the new summary.
- Never drop entities from the previous summary. If space cannot be made, add fewer...

Remember, use the exact same number of words for each summary. Answer in JSON. The

## Na przykładzie tzw. "CHAIN OF DENSITY"

- Zaczynamy z prostym podsumowaniem
- W każdym kroku patrzymy, jakie kluczowe "byty" nie zostały uwzględnione
- Staramy się je uwzględnić tak, aby nie usunąć starych
- Powtarzać do sensownego limitu

# PROSTA SUMARYZACJA

**Sam Altman** and co-founder **Greg Brockman** are still willing to return as CEO and president, respectively, of **OpenAI** if the board members who fired **Altman** step aside. **Altman's** surprise move to **Microsoft** after his firing from **OpenAI** has not been finalized, and negotiations are currently ongoing. **Altman** has expressed his commitment to ensuring **OpenAI** continues to thrive, as well as providing continuity of operations to partners and customers. The remaining board members who oppose **Altman** have not responded to requests for comment.

# CHAIN OF DENSITY

Widespread employee resistance against the board following **Sam Altman's** expulsion from **OpenAI** has led to a power struggle, with **Altman** and co-founder **Greg Brockman** demanding the board's resignation. The unease grew after **Emmett Shear's** appointment as CEO and the board's undercover CEO hunt. **Altman's** potential move to **Microsoft** remains unfixed, with **Microsoft's** CEO **Satya Nadella** leaving it to **OpenAI**. Significant is **Ilya Sutskever**, **OpenAI's** chief scientist, reversing his stance on **Altman's** removal. Meanwhile, the silent board is comprised of **Quora** CEO **Adam D'Angelo**, former **GeoSim Systems** CEO **Tasha McCauley**, and **Helen Toner**

# Wygląd i "spójność z promptem"

applications flow out of the vertically standing monitor as if they were pouring out, without people, tech, ai, isometric style, violet-pink colors, white background

## Midjourney vs ChatGPT (DALL-E)

Applications flowing out of a vertically standing monitor as if they were pouring out, depicted in an isometric style. The scene is set against a white background, with the applications and the monitor rendered in violet and pink colors. There are no people in the scene, emphasizing a focus on technology and artificial intelligence.

# Wygląd i "spójność z promptem"

applications flow out of the vertically standing monitor as if they were pouring out, without people, tech, ai, isometric style, violet-pink colors, white background

## Midjourney vs ChatGPT (DALL-E)

Applications flowing out of a vertically standing monitor as if they were pouring out, depicted in an isometric style. The scene is set against a pure white background, with the applications and the monitor rendered in violet and pink colors. There are no people in the scene, emphasizing a focus on technology and artificial intelligence.

# Cover

# Problem

UBER

## Problem: Cabs in 2008

### Most use aging & inefficient technology

- Radio dispatch, no 2-way communication
- Most common car, Ford Crown Victoria = 14mpg

### Hailing is done by hand or phone

- No GPS coordination between client/driver
- Significant fare-seeking or "dead-time"

# Solution

UBER

## How it works: 1-Click Car Service

**Must be a member  
to use the service**

*Professional and  
trustworthy clientele*

**Not hailed from street**

*So no medallion licenses  
are required, since clients  
are service members &  
use digital-hail*

**Guaranteed Pick-up  
(unlike a yellowcab)**

*Mobile app will match  
client & driver  
See photos  
of each other*
